

Tables of Feed-in Tariffs based on the eligible installation date

Feed-in Tariffs depend on the type of renewable energy [technology](#), the size of the system and the date of registration.

They are designed to increase with [inflation](#) and to reflect [cost reductions](#) for systems which are installed later.

This first table shows the **starting** tariff level. See notes overleaf about definitions and the **orange cells**. It includes changes in the [Fast-track Review](#) and Phase 1 of the [Comprehensive Review](#), but **not** any changes to come from Phase 2.

Starting tariff (p/kWh)		Installation eligibility dates between >

See notes on the following page. It also shows **index-adjusted** tariff payable this year, depending on the registration date.

Tables of Feed-in Tariffs

This second table shows the *index-adjusted* tariff payable during the fiscal year ending 31st March 2013, depending on the registration date.

Figures for installations in this fiscal year are the same as the previous page.

Current tariff (p/kWh)		01-Apr-10 - 31-Mar-11	01-Apr-11 - 31-Jul-11	01-Aug-11 - 29-Sep-11	30-Sep-11 - 02-Mar-12	03-Mar-12 - 31-Mar-12	01-Apr-12 - 31-Mar-13

For solar PV systems:

- Standalone systems are defined as not attached to a building and not wired to provide electricity to an occupied building
- Bldg systems are all which do not meet the definition for Standalone
- New bldg installations are building systems applied to a new building before first occupation
- Retrofit bldg installations are building systems applied to a building which is already occupied

Figures in the **orange cells** show the "higher rate" tariffs which apply to these bands where neither of the following apply:

- If the building to which the system is connected is not energy efficient, as evidenced by an Energy Performance Certificate at level A to D, the tariff is 9.0p/kWh.
- If the registrant has a total of 25 or more FITs-eligible PV systems, the tariff is 80% of the level shown (to nearest 0.1p); tariffs are ~~21.0~~ 16.8, ~~16.8~~ 13.4, ~~15.2~~ 12.2 and ~~12.9~~ 10.3p/kWh.

The figures in this second table are shown in [Ofgem's](#) publication. Historical starting tariffs are available in earlier tables from Ofgem, which has now stopped publishing future tariffs (as we show in the previous table).
